SAN JOSE, CALIFORNIA

November 25, 1929

LIST 2909

THIS LIST COVERS STOCK OFFERED BY

CLARKE NURSERY CO.

SAN JOSE, CALIF.

SEASON 1929-1930

PLEASE NOTE

All summer quotations not accepted to date are hereby cancelled.

Terms. To buyers of known or established credit, 60 days from date of invoice. Otherwise cash with order or 25% with order, balance C. O. D.

Grading. Plants that are wider than they are tall are graded by width.

Quantities. Five or more plants of one kind and size will be supplied at 10 rate; 50 or more at 100 rate; 500 or more at 1000 rate.

Pots. Prices on pot grown stock do not include the pots and unless otherwise instructed plants will be removed from pots before shipping. If wanted in the pots they will be charged for at cost, but can be returned if desired and credit will be given.

Packing. Will be charged for at cost as usual, including paper pots if used. Plants will be packed to secure lowest possible freight classification consistent with the nature of goods shipped. All prices are at our nursery.

Shipping. Our responsibility ceases when goods are delivered to transportation company in good order. They travel at buyer's risk. Please state distinctly whether you wish goods shipped by freight or express and where water shipment is possible be sure to specify by water or rail as you may prefer.

Nomenclature. Plant names, both botanical and common, have been revised to conform with 1923 edition of "Standardized Plant Names," with the addition of a few common names widely used on the Pacific Coast.

This list covers items of which we now have a fairly good supply unsold. Many other things can be furnished in moderate quantities and quotations will be made on request. So if you want any ornamental stock not listed here write us about it.

This list is for the trade only and all prices are strictly net. Landscape Architects and Landscape Gardeners who are not actual nurserymen will be charged 20% in addition to the rates quoted herein.

Both firms are members of
CALIFORNIA ASSOCIATION OF NURSERYMEN

Novelties and Specialties

Special attention is called to the following items. Available sizes and prices are shown in the corresponding divisions of this list.

CONIFERS

CHAMAECYPARIS lawsoniana stewarti. Our best golden-hued conifer. All winter when Golden Arbor Vites lose their color this is at its brightest.

CHAMAECYPARIS lawsoniana wisseli. Wissel Cypress. Growth narrow and erect. Color sage or blue green. Foliage moss like. Rare and beautiful.

CUPRESSUS glabra stricta. A chance seedling originating with us. Growth much like Italian Cypress but becomes thicker at base. Color bright silvery blue. All plants offered are grafted, hence uniform.

THUYA orientalis beverleyensis. Not a novelty, but still far from common. Growth erect and slender. Color vivid gold except in winter. As it does not sunburn it is entirely supplanting the old *Thuya aurea* conspicua to which it is superior in every way.

BROAD LEAVED EVERGREENS

ARBUTUS menziesi. Madrone. Probably our most beautiful native tree. Hard to propagate and of slow growth at first, it has always been scarce. We are now able to furnish it in quantity.

BERBERIS knighti. Has the most beautiful foliage of all the Barberries. It has been scarce for several seasons but we now have a fairly good stock.

BERBERIS verruculosa. This is the first time we have been able to offer this excellent and distinct novelty. Growth very compact, leaves small and holly-shaped.

CEANOTHUS arboreus hybridus. Flowers range through every shade of blue from palest lavender to deepest violet.

CEANOTHUS cyaneus. This beautiful "Wild Lilac" was discovered only a few years ago in San Diego County. We have grown it before but always sold out before price list was issued. It is of rapid growth and bears a tremendous profusion of flower spikes up to 10 or 12 inches long. Color is the deepest imaginable blue. One of the best introductions in years.

COTONEASTER harroviana. Surpasses all other Cotoneasters in the profusion of red berries.

COTONEASTER praecox. Growth is semi-prostrate, about like *C. horizontalis* but has some what larger leaves with wavy margins. Its greatest merit is in the large red berries which are colored by the end of June long before any other has even started to color. It has been greatly admired by all who have seen it here. Stock very limited.

COTONEASTER pyrenaica. A rare and little known species. Perfectly evergreen, leaves very small and growth directly downward so that it is usually top-grafted. Particularly good for Japanese Gardens, rockwork, etc.

COTONEASTER Standards. By top grafting the various Cotoneasters on straight stems at various heights a unique effect is obtained. This is particularly striking in the prostrate varieties such as *C. horizontalis*, *microphylla*, *prostrata*, *pyrenaica*, etc.

CYTISUS scoparius andreaeanus. This is the striking variety which has yellow and mahogany red flowers. Our grafted stock is very limited but a large percentage of the seedlings offered will come true.

EUCALYPTUS erythronema, pyriformis, tetraptera and torquata. These are all new red flowering species. *Erythronema* is absolutely hardy here and has bloomed freely. We think the others are also hardy, but have not tested them so thoroughly.

PHOTINIA arbutifolia. Toyon, Christmas Berry, California Holly. Although extremely popular this is very difficult to grow successfully for the first two years from seed. By careful study we have mastered the process and have by far the largest stock in the country.

PHOTINIA serrulata nova. Raised from seed imported from China. It is quite distinct from the *Photinia serrulata* we have had for years in California. Leaves have slightly prickly margins, new growth is coppery and the whole appearance is very attractive indeed. Ought to become very popular. Sales have been so heavy that we can offer only small plants.

PITTOSPORUM phylliraeoides. Willow Pittosporum. Although very popular in Southern California it is almost unknown in other parts of the State. It is absolutely hardy in San Jose with a usual winter temperature of 24 degrees so will thrive in most sections of California. Has the appearance and habit of an evergreen Weeping Willow.

RAPHIOLEPIS indica rosea. A form of *Raphiolepis indica* with pink flowers about the color of a Testout rose. Originated here as a chance seedling and propagated by grafting. Hitherto our entire output has been taken by two or three customers but we now have a larger stock.

STRANVAESIA davidiana. Introduced by U. S. D. A. Growth is very vigorous. Bears large clusters of red berries. Perfectly hardy.

TEMPLETONIA retusa. Not a novelty, but scarce and very little known. A leguminous shrub with attractive foliage bearing coral red, somewhat peashaped flowers over an inch long.

FLOWERING FRUIT TREES

WEeping APRICOTS, CHERRIES and PEACHES. These are all very novel and striking trees. The Apricots and Peaches are extremely rare

JAPANESE FLOWERING CHERRIES. Although we have specialized in these trees for years and have probably the largest collection of varieties in this country, demand has been so great that we have usually sold out before price list was issued. We are now propagating them more heavily and only a few kinds are sold. The others are offered herein with very brief descriptions. If you wish more complete information write for our Descriptive Cherry Circular.

PEACH San Jose Pink. Offered for the first time. Flowers double pink of medium size. It is far earlier than any other peach in our collection which should make it extremely valuable for commercial cutting.

PLUM blirieana. Not at all a novelty on the Pacific Coast as we introduced it from Europe in 1917. But as it seems to be entirely unknown in the East we mention it here. Has purple leaves like *P. pissardi* and beautiful rich pink, full double flowers which are produced very early. Splendid for cutting.

DECIDUOUS TREES

BETULA pendula youngi. Young's Weeping Birch. Has the usual white trunk. Entirely different from Cut-leaf Birch. The main branches are very drooping and tree is entirely free from formality or stiffness.

CRATAEGUS, Hawthorn. Eastern customers are buying these beautiful trees from us more heavily each year. Conditions here seem ideal for their production. The branched trees have perfectly straight trunks and well developed heads.

KOELREUTERIA integrifolia. A new species of Golden Rain Tree from China. Beautiful bipinnate foliage and large clusters of yellow flowers.

MORUS alba pendula. Tea's Weeping Mulberry. A well known tree. We have a fine stock of excellent trees.

POPULUS tremula pendula. Weeping Poplar. Top grafted on erect stems it makes a very picturesque tree. A table with benches is often built around the trunk. Very striking when in bloom as the catkins are several inches long.

SALIX babylonica annularis. Ringleaf Weeping Willow. Not new but rare. Growth more erect than Common Weeping Willow but with same drooping branches as it attains age. Its marked characteristic is the shape of the leaves. Each one is curled into a complete circle or ring giving the tree a most unusual and attractive appearance.

SORBUS aucuparia pendula. The weeping form of Mountain Ash is rare and of very striking appearance.

DECIDUOUS SHRUBS

FORSYTHIA intermedia spectabilis. Far ahead of the older Forsythias. Will outbloom any of them two to one. The color is a deep golden yellow, not pale like most. Further, it has long erect shoots which are covered with flowers the second year. Not only a fine garden shrub but should be very valuable for those who grow cut flower material for the florist trade.

SPIREA froebeli. Has flower clusters of same size, shape and color as Anthony Waterer (deep wine red) but is a much more vigorous grower hence decidedly less expensive.

LILACS. Our list is "boiled down" by continued selection from about 150 varieties which we have tested. We have dropped all but the very best of the older varieties as the newer ones are so far superior. There is no use of being satisfied with inferior sorts 30 or 40 years old when this magnificent collection is available. We offer the latest European novelties including several of the new "Early Flowering Lilacs," a distinct race which flower two or three weeks ahead of the ordinary type. A marked feature of most of these is their great vigor. Due to their long stems, earliness and habit of bearing flowers well above the foliage they are of the greatest value for commercial cutting. For descriptions, see page 22.

CLIMBERS

WISTERIA multijuga rosea. Pink Wisteria. Our stock is guaranteed to be absolutely genuine pink.

WISTERIA sinensis. There is much complaint about Wisterias not blooming for years after planting. Much of this is due to planting seedlings. Even grafts are slow unless properly handled in the nursery. We have solved this problem and guarantee that at least 75% of our 3 year and 4 year grafts of this variety will bloom at once in Spring 1930.

MISCELLANEOUS

HESPEROYUCCA whipplei. This is our native yucca whose enormous flower spikes lend so much beauty to the foothill region of southern California. Is not long in coming into bloom. Flower spikes often 10 or 12 ft. tall with hundreds of flowers.

CONIFERS

Unless otherwise noted all plants in this section will be balled at prices quoted.

To Eastern Nurserymen

Please look carefully through enclosed price list.

Many items are so readily grown in California that it is cheaper to get them from here than to raise or buy them elsewhere.

California may seem a long way off, but freight is not serious on deciduous stock. Furthermore, while we cannot promise to do so in all cases, we are very often able to combine different orders and give to all the benefit of car-load rate which is identically the same **TO ANY POINT EAST OF THE ROCKIES.**

We particularly call your attention to the following: Japanese Cherries, erect and weeping; Schwedler Maples; Cutleaf and Young's Weeping Birch; Hawthorns of various kinds; Weeping Mulberries; Lilacs and grafted Wisterias. Also please be sure to read pages 2 and 3, which you will undoubtedly find of interest.

We solicit inquiries for anything in the nursery line produced on the Pacific Coast.

W. B. CLARKE & SON,
San Jose, Calif.

FLOWERING FRUIT TREES

All plants in this section will be dug with bare roots.

N. B. Our Almonds, Apricots, Cherries, Peaches and Plums are grown outside of the Peach Root Borer district, so can be shipped anywhere.

See page 3

FLOWERING ALMONDS

AMYGDALUS communis, Double Pink (tree)			
4 to 6 ft.....	.75	.60	
3 to 4 ft.....	.60	.50	
PRUNUS glandulosa trichostyla sinensis, Dwarf Double Pink Almond			
3 to 4 ft., 2 year.....	.65	.50	

FLOWERING APPLES

MALUS ioensis bechteli, Bechtel Crab			
6 to 7 ft.....	1.50	1.25	
2 to 3 ft.....	.75	.60	.50
1 ½ to 2 ft.....	.65	.50	.40
niedzwetzkyana, Redvein Crab			
10 to 12 ft.....	1.50	1.25	
8 to 10 ft.....	1.25	1.00	
4 to 6 ft.....	.75	.60	
Large Flesh Pink			
10 to 12 ft.....	1.50	1.25	
8 to 10 ft.....	1.25	1.00	.75
6 to 8 ft.....	1.00	.75	.60
4 to 6 ft.....	.75	.60	

FLOWERING APRICOTS

PRUNUS mume Dawn (double pink)			
4 to 6 ft.....	.75	.60	.50
3 to 4 ft.....	.65	.50	
Early Double Pink			
4 to 6 ft.....	.75	.60	
3 to 4 ft.....	.65	.50	
Weeping Red (top worked)			
5 ft. stem.....	2.00	1.50	
4 ft. stem.....	1.75	1.25	
3 ft. stem.....	1.50		

FLOWERING CHERRIES

Descriptions are greatly condensed. For further details write for our special Cherry Circular

		each rate	10 rate	100 rate
Group A				
4	to 6 ft.	2.00	1.65	1.50
3	to 4 ft.	1.75	1.35	1.25
2	to 3 ft.	1.50	1.10	1.00

Campanulata, single red; earliest of all	Ojochin, single; pale flesh, large petals
Daybreak, single pink; next earliest	Shogetsu, double; soft pink
Jugatsuzakura (P. subhirtella autumnalis), single; light pink	Taizanfukun, double; light pink
Kanzan, double pink; very large flowers	Takasago, double, pink; flowers in large clusters
Kuramayama, double; flesh pink edged carmine	Takinioi, single; very fragrant
Miyako, double white; very large	Ukon, double yellow
Momijigari, semi double; deep pink	Victory (Shirofugen), white and pink; very double; very large flowers
Naden, very double; deep pink	Yedozakura, double pink

Group B (stock very limited)			
4	to 6 ft.	2.00	1.75
3	to 4 ft.	1.75	1.50
2	to 3 ft.	1.50	1.25

Hizakura, double; light pink, early	Serrulata spontanea S.P.I. 67955, single pink; early
Hosokawa, single white; fragrant	Serrulata spontanea S.P.I. 67963, single light pink; early
Minakami, single white; fragrant	Shirataamazakura, single; light pink
Ochichima, double; pale pink	Shirotae (Mt. Fuji), double; white
Oshimazakura, single; white	Subhirtella ascendens, single; light pink, very early
Pink Pearl, double; light pink	Wasinowo, single white; fragrant
Sekiyama, double pink; probably same as Naden	
Serrulata spontanea S.P.I. 45178, single white; very early	

WEeping VARIETIES

Double Pink Weeping			
Top worked on 5 ft. stem	3.00	2.50	
Top worked on 4 ft. stem	2.50	2.25	2.00
Eureka Weeping (Shidarehigan; P. subhirtella pendula) (flowers light pink)			
Top worked on 6 ft. stem	3.00	2.25	
Top worked on 5 ft. stem	2.50	1.90	1.75
Top worked on 4½ ft. stem	2.25	1.75	
Top worked on 4 ft. stem	2.00	1.60	1.50
Park Weeping (flowers dark pink)			
Top worked on 5 ft. stem	2.50	1.90	1.75
Top worked on 4½ ft. stem	2.25	1.75	1.60
Top worked on 4 ft. stem	2.00	1.60	1.50
Shidareyoshino (flowers single white)			
Top worked on 5 ft. stem	2.50	1.90	
Top worked on 4 ft. stem	2.00	1.60	

FLOWERING PEACHES

Weeping Double Red		
Top worked on 4 ft. stem	1.75	1.25
Weeping Variegated (flowers white and red)		
Top worked on 4 ft. stem	2.00	1.50
Novelties and Specialties		
4 to 6 ft.	1.25	1.00 .75
3 to 4 ft.	1.00	.75 .60

San Jose Pink (double pink and by far the earliest variety. Very valuable for cutting on account of its extreme earliness.)

Versicolored B. (flowers double, red and white. A very striking color combination.)

General Collection			
4 to 6 ft.	1.00	.75	.60
3 to 4 ft.	.75	.60	.50

Burbank, double pink	Double Red, double red
Camelliaflora, double red	Double White, double white
Double Cerise, double cerise	Early Red, double red
Double Maroon, double maroon	

FLOWERING PLUMS

		each rate	10 rate	100 rate
PRUNUS blirieana (leaves purple, flowers double pink)				
4	to 6 ft.	1.00	.85	.75
3	to 4 ft.	.75	.60	
pissardi (leaves purple, flowers single)				
6	to 8 ft.	1.00	.75	
4	to 6 ft.	.75	.60	.50
3	to 4 ft.	.65	.50	
Vesuvius (large purple leaves)				
4	to 6 ft.	.75	.60	
3	to 4 ft.	.60	.50	

DECIDUOUS TREES

All plants in this section will be dug with bare roots.

See page 3

ACER dasycarpum, Silver Maple				
14	to 16 ft.	2.50	2.00	
10	to 12 ft.	1.50	1.25	
8	to 10 ft.	1.25	.85	.75
6	to 8 ft.	1.00	.75	.60
platanoides, Norway Maple				
8	to 10 ft.	1.25	1.00	.75
6	to 8 ft.	1.00	.75	.60
platanoides schwedleri, Schwedler Maple (purple leaves)				
4	to 6 ft.	1.00	.75	.60
saccharum, Sugar Maple				
10	to 12 ft.	1.50	1.25	
8	to 10 ft.	1.25	1.00	
6	to 8 ft.	1.00	.75	
ALBIZZIA julibrissin, Silktree				
4	to 6 ft.	1.00	.75	
3	to 4 ft.	.75	.60	
2	to 3 ft.	.60	.50	
BETULA pendula (B. alba), European White Birch				
10	to 12 ft.	2.00	1.50	
8	to 10 ft.	1.75	1.25	1.00
6	to 8 ft.	1.25	1.00	.75
4	to 6 ft.	1.00	.75	.60
pendula gracilis, Cutleaf Weeping Birch				
12	to 14 ft.	3.00	2.50	
10	to 12 ft.	2.50	2.00	1.75

LILACS

Named Varieties

All our Lilacs are budded. They are pinched when a few inches high so all sizes are branched. Practically all will bloom the first season.

NOVELTIES AND SPECIALTIES

Available sizes shown after each variety. Descriptions below.

		each rate	10 rate	100 rate
3	to 4 ft.	1.50	1.25

DESCRIPTIONS OF LILACS

NOVELTIES

Capt. Baltet—Single. Violet lilac.

Jan Van Tol—Single white. Both the clusters and the individual flowers are of enormous size.

A very good grower and free bloomer. Very fine.

Katherine Havemeyer—Double. Cobalt blue flushed mauve. Flowers very large. One of the handsomest.

Maurice Barres—Single. Mauve opening lilac blue.

Mme. Francisque Morel—Double. Light creamy lilac. Very fine.

Pres. Faillieres—Double, lavender pink. Color charming. Trusses simply enormous. Flowers large and very double. Truly magnificent and easily the best.

Pres. Poincare—Double. Claret mauve. Clusters of unusual size, very compact, with very large flowers. One of the best.

Volcan—Deepest purple. Very late.

1928 SET

*Buffon—Single. Flowers large, pink shaded mauve.

*Descartes—Single. Mauve blue. Exceedingly free blooming. Flowers before leaves appear.

Diderot—Single. Deep purple; buds almost black. Clusters very long and narrow.

Edith Cavell—Double. Milk white. Buds tinted deep cream. Handsome.

Edouard Andre—Double. Rose or nearly pink.

*Louvois—Single. Purple becoming blue. Clusters extra large.

Montaigne—Double. Pinkish mauve. Very large clusters.

Mont Blanc—Single. White. Large flowers and clusters. Very fragrant.

Waldeck-Rousseau—Double. Deep violet flowers, borne in long trusses.

GENERAL COLLECTION

Double Varieties

*Berryer—Mauve. Petals curly. Free bloomer.

Chas. Sargent—Violet mauve blended sky blue; enormous flowers and clusters.

*Claude Bernard—Bright mauve. Included in the "Early Lilacs" but really in a class by itself and distinct from all others. Petals are long and wavy or twisted. Largest flowers are an inch broad. Very fine.

Condorcet—Almost pure blue. Semi-double.
Ellen Willmott—Snow white. Elegant spikes; fine large flowers of the "hose in hose" type.
Emile Gentil—Bright cobalt-blue.
Georges Bellair—Carmine becoming purple. Very profuse and compact.
Hippolyte Maringer—Purplish mauve; compact clusters.
Jean Bart—Carmine becoming rosy purple. Petals sharp and twisted. Unique.
Jean Mace—Mauve changing to bluish purple. Very good.
Jeanne d'Arc—White. Flowers very large. Very early, profuse and fine in every way.
La Tour d'Auvergne—Dark lilac, good.
Leon Gambetta—Pink-lilac. Early. Among the best.
Marechal Lannes—Mauve becoming pinkish blue. Beautiful color.
Maximowicz—Violet heliotrope. Clusters long and well filled.
President Loubet—Deep purple becoming reddish lilac.
President Viger—Purple becoming lilac. Clusters large and dense.
***Vauban**—Pale mauve pink. Panicles large. Delicious fragrance. Extremely free bloomer.
 Strong grower.
Victor Lemoine—Pinkish purple becoming mauve blue. Clusters much forked. Strong fragrance.

Single Varieties

Christopher Columbus—Opens clear blue. Late.
De Miribel—Dark bluish violet. Very late.
Dr. Breitschneider—Pure pink. Blooms on new wood, hence late.
Dr. Lindley—Brilliant violet-purple, buds red. Fine regular clusters.
Edmond Boissier—Dark purple. Flowers very large.
Gloire de Lorraine—Dark lilac becoming blue.
Hugo Koster—Reddish purple. Clusters of good size and regular form.
***Lamartine**—Mauve pink. Clusters much forked. Flowers large. Extremely vigorous and one of the earliest.
Ludwig Spaeth—Dark purple. Clusters long and slender. Late.
Lutece—Pink. Very late. Blooms on new wood.
Marie Le Graye—White. Early. An old favorite.
***Mirabeau**—Mauve. The earliest of all. Extremely vigorous.
***Pascal**—Pure lilac. Very free. Less vigorous than other "Early Lilacs."
Perle Von Stuttgart—Pure white. Both flowers and clusters very large.
Vestale—White. Flowers large. Our earliest white variety. Very fine.
 *Varieties starred are the new "Early Lilacs." These are hybrids between *Syringa giraldi* and the earliest varieties of *S. vulgaris*. They are very distinct from previous varieties in both appearance and habit. They are ten days to two weeks earlier and the clusters are borne well above the foliage at the ends of long erect branches. Leaves are only partially developed when they bloom. These features give them very great value as cut flowers. We recommend them highly.
